Assembly Steps

- 1. Assemble the Strap:** Insert the provided retractable pins into the strap’s fixing holes. On both sides of the watch base, there are small holes. Insert one side of the retractable pin into the hole and press the other side with your finger to secure it. Repeat the process for the other side of the strap.

2. Install the Battery: Connect the battery's wires to the corresponding interface on the main circuit board. After connecting, adjust the battery's position to facilitate the installation of the watch base.

3. Install the Base: Align the watch base with the BUS interface on the main unit and insert it vertically. Secure it with the provided screws to complete the assembly.
