

Grove T

SKU:U039-B

Description

Grove T is a Grove adapter expansion port. Its T-shaped design allows one GROVE interface to be expanded into two.

Note: Similar to the Hub Unit, although it can be used to expand hardware GROVE interfaces, for application scenarios where multiple I2C devices with the same address or other bus protocol hardware are mounted, to prevent address conflicts, **PaHUB** or **PbHUB** should be used.

Includes

- 5 x Grove T

Specifications

Specification	Parameter
Package Size	138.0 x 93.0 x 16.0mm
Product Weight	4.0g
Gross Weight	19.0g
