

Stamp-C5 Blue LED

Stamp-C5 Blue LED related APIs and example programs.

Example Programs

Compilation Requirements

- M5Stack Board Manager version $\geq 3.3.8$
- Development board option = M5StampC5

cpp

```
1  #define BLUE_LED_PIN 28
2
3  bool blue_ledState = false;
4
5  void setup() {
6      pinMode(BLUE_LED_PIN, OUTPUT);
7  }
8
9  void loop() {
10     blue_ledState = !blue_ledState;
11     digitalWrite(BLUE_LED_PIN, blue_ledState);
12     delay(1000);
13 }
```

This program controls the blue LED on the device to blink at 1-second intervals, which can be used for status indication or debugging:
